CORE SKILLS

Figma

Prototyping

Design Systems

Wireframing

Interaction Design

Visual Design

Brand Identity

User Research

Responsive Design

Usability Testing

TOOLS & AI

AI Design Tools

Freepik Assets

COLLABORATION

- Paired with senior designers
- Participated in design reviews
- Cross-team design critiques
- Shared Figma libraries
- Aligned with developers on handoff
- Client & stakeholder presentations

EDUCATION

B.A. Applied Languages
Alexandria University
2020 - 2024

UI/UX Course
Route Alexandria
09/2024 - 12/2024

PROFILE

Creative UX/UI Designer specializing in AI-powered enterprise products. Experienced in cross-functional collaboration with designers, developers, and product managers across Egypt, Poland, and Canada. Leads end-to-end design from research and wireframes to high-fidelity prototypes, design systems, brand identity, and developer-ready handoff.

EXPERIENCE

UX/UI Designer

Flairstech - International Software Company | Feb 2025 - Present

- AiMY Connect:** Designed the omnichannel operations center for routing, queue management, real-time monitoring, supervisor takeover, SLA alerts, and autonomous ticket triage across voice, chat, tickets, and email.
- AiMY Knowledge:** Led UX for a RAG-powered retrieval agent surfacing contextual answers with citations and confidence scores across helpdesk tickets, Confluence, SharePoint, PDFs, Word docs, and web sources.
- AiMY QA:** Owned UI design for the quality and KPI governance agent for scoring calls and tickets against configurable KPI frameworks and feeding failure signals back into AiMY Knowledge.
- AiMY Sales:** Designed an AI-native BDR operating system with rep task queues, live coaching, post-call guidance, and a manager generative UI canvas for funnel health and scorecards.
- AiMY Talent:** Built a chat-first HR operating system for recruitment, candidate cards, pipeline insights, and WhatsApp message outputs.
- Brand & Platform:** Created brand identities and design systems across the AiMY product suite while keeping a cohesive platform language and clear product roles.
- Cross-Functional:** Collaborated with senior designers, peer designers, developers, and product managers through reviews, critiques, shared libraries, handoff alignment, and stakeholder walkthroughs.

Customer Service Representative

Previous role (Prior to 2025)

Built empathy, active listening, and real-user problem-solving skills through engagement with English-speaking clients, now applied directly to user-centered design decisions.

KEY PROJECTS

**Screens are confidential. Detailed walkthroughs are available in a private 1-to-1 meeting upon request.*

AiMY Connect : Omnichannel operations center connecting AI resolution with agents, supervisors, and clients. Supports routing, unified queues, SLA-aware escalation, supervisor takeover, L2 ticket creation, and after-hours triage.

AiMY Knowledge : RAG-powered retrieval and knowledge management experience across helpdesk tickets, Confluence, SharePoint, PDFs, Word docs, and web pages, returning contextual answers with citations.

LANGUAGES

Arabic: Native

English: Fluent

AiMY QA : QA flows for evaluating calls and tickets against configurable KPI frameworks, surfacing coaching opportunities, and feeding failure signals back into AiMY Knowledge.

ADDITIONAL STRENGTHS

- **Confidential product storytelling:** Explains design process and outcomes without exposing sensitive client screens publicly.
- **Multi-designer collaboration:** Comfortable with critiques, component libraries, shared exploration, and design review cycles.
- **Developer-ready handoff:** Documents edge cases, responsive behavior, component states, and interaction details clearly for implementation.
- **Product thinking:** Connects UX decisions to business workflows, operational constraints, and user roles across support, sales, QA, knowledge, and HR.
